

Making Solar Affordable

4509 NW 23rd Ave, Suite 20, Gainesville, FL 32606 Office 352-338-8221 Fax 352-395-7659 Web www.solarimpact.com

What is the GRU Solar Feed-in Tariff and why will GRU PAY me top dollar for power produced by my solar electric system??

GRU will pay a premium for your solar electric power for a simple reason – *BECAUSE THEY HAVE TO*. The City of Gainesville owns GRU and the city decided in 2009 to develop a program that financially incentivizes homeowner’s to install solar electric systems.

You pay GRU between 15¢ -18¢ per kilowatt-hour for electricity. Your rate depends on many factors. GRU will send you a check paid at 29¢ per kilowatt-hour for all electricity produced by your solar electric system. Simply, this means GRU will pay you TWICE what you are paying them for electricity!

When this program opened in 2009, it booked up quickly. It is temporarily reopening because not all of these projects were installed. Demand will be strong and the space will be limited, so don’t miss out!

What’s in it for me?

Money from GRU – You send money to GRU every month. Imagine getting a monthly check FROM GRU! These checks will average \$200-\$400 per month, depending on the size of your system. Your annual return on investment will be 13-18%. How are your other investments doing?

Increase your home’s value – Nothing adds value to your home like solar. According to industry experts, your system will add \$30,000 to \$65,000 to the value of your house.

Take control of your power bill – After years of stable electricity prices, nobody knows what’s going to happen next. When you own a solar power plant, you no longer need to worry about rising prices!

Protect the environment and our county – Your solar electric system will reduce greenhouse gases and our dependence on foreign fuels. You’ll feel good knowing that you’re making a difference.

Why Solar Impact?

Most experience – We are the largest solar company in North Central Florida. Our Florida licensed professional engineer, who is also certified by the National Board of Certified Energy Practitioners, designs each system. It is critically important that your solar contractor can legally design your system and is NABCEP certified. Each system is installed by highly experienced, licensed, and insured solar, roofing, and electrical contractors.

Low price – Solar Impact has led the industry in driving down the cost of solar from day one. We love solar and believe that the only way that it will flourish is to make it affordable for everyone.

Extras – Even with our low pricing, we still give you extras that others charge for. You will get a web-based monitoring system so that you can see how your system is doing and it allows us to continually monitor your system to make sure that it is maintaining peak performance.

How do I get started?

Call Solar Impact today! – Schedule your free solar survey to find out if you get enough sunlight throughout the year. We use specialized solar equipment that will provide concrete answers. We’ll also help you understand how your solar system will work and how you will benefit financially.

Once you’ve decided that solar is right for you, we’ll be there every step of the way – from selecting the best size system for you to watching your new system spin the electric meter backwards!
